	<p>The system should have sperm viability assessment hardware and software to be provided for stained sperm with non-membrane permeable DNA stain and calculate viable sperm numbers under fluorescence.</p> <p>The system should allow storage and retrieval of exact fields analyzed.</p> <p>The sample stage should be automatic and computer controlled, provides precise control of temperature and should be able to use for manual or automatic field selection.</p> <p>The system should be supplied with suitable printer, UPS. The computer and Microscope with other hardware should be inbuilt in one control Box.</p> <p>The unit should also be supplied along with all accessories and spares suitable for One year and optional rates for consumables may also be quoted.</p> <p>The unit should be supplied complete in all respects.</p> <p>The Equipment must be quoted with all additional software's and one year warranty including onsite training & installation. The supplier should have their services center in India to provide after sales services and all relevant details should be provided in tender.</p>
--	--

General:

- Scope of work includes supply, installation , commissioning and Training at the place of delivery.
- Bidder should provide detailed specification with make and model no. of the instrument.
- The concern should have experience of installing successfully such systems in CMU Graded Semen Labs in India, for which necessary documents must be attached. The satisfactory working report from the user also to be attached.

Chief Executive Officer
